

Why Choose Liniar ModLok™ Bi-Folding Doors?

Liniar's ModLok™ bi-folding doors

offer a totally unique option, thanks to the patented exoskeleton design giving them unparalleled strength, security and durability giving homeowners piece of mind.

TIMELESS IN APPEARANCE AND ROBUST ENOUGH TO IMPRESS A QUEEN

No other PVCu bi-folding door has been tested to over 127,000 full opening cycles; and with low U-values, PAS:24 and Secured By Design accreditation, the Liniar ModLok™ is in a class of its own – earning the accolade of a Queen's Award for Enterprise in Innovation in 2017.

Ideal for large openings, ModLok™ bi-folds enable you to open up an entire wall of your room – creating space and letting fresh air and natural daylight flood into your home.

SUPERIOR EFFICIENCY

And Liniar's 'top of the range' ModLok™ bi-fold doors offer even greater strength and rigidity, combining all of the structural benefits of an aluminium door set with the energy efficiency of uPVC.

All Liniar bi-folding doors are 'bottom rolling', not top-hung – meaning no extra stresses are placed on your building's lintel.

STUNNING ALTERNATIVE

Whether you have a bedroom with a Juliette balcony, a kitchen-diner, a conservatory or an orangery, Liniar ModLok™ bi-folding doors can provide a stunning alternative to patio or French doors. Available in a wide choice of opening configurations and colours, the Liniar ModLok™ bi-fold has ultra-slim sightlines, providing rooms with a clean, modern appearance.

Safety features include the innovative low threshold option for family friendly and wheelchair use. What's more, Liniar bi-fold doors offer high energy efficiency, combined with the best security features on the market – bringing you a modern space-saving solution for your home that will definitely give it the 'wow' factor. Find out about the range of thresholds available from your sales representative.
